

# Offer online notarization under your own brand

Give clients a Remote Online Notarization experience that looks and feels like your business - not a third-party handoff.

# What is Remote Online Notarization?

Remote Online Notarization (RON) lets you notarize documents through a live audio/video session instead of meeting in person.

*Available if RON is authorized for you in your state.*

# RON is more than a video call

To complete an online notarization, you need to manage:

Identity verification

A live audio/video session

Digital certificates and notary seal

A clear record of the session

Payment for the signing

# Your client experience, your brand

Send clients into a notarization flow that reflects your business, from entry to completion - without handing them off to another platform.

Your Business Name

Begin Notarization

# No session without identity verification

Signers must complete a state-aligned identity verification process before entering the signing session. If they don't pass, they can't proceed.

*You can also proceed with a personally known signer when applicable.*

Identity check required

# Set up your digital notary tools with guidance

Get step-by-step help configuring your digital certificate, notary seal, and notary stamp - so you're ready to perform RON.

1

## Digital Certificate

Upload or configure your certificate

2

## Notary Seal

Design and apply your digital seal

3

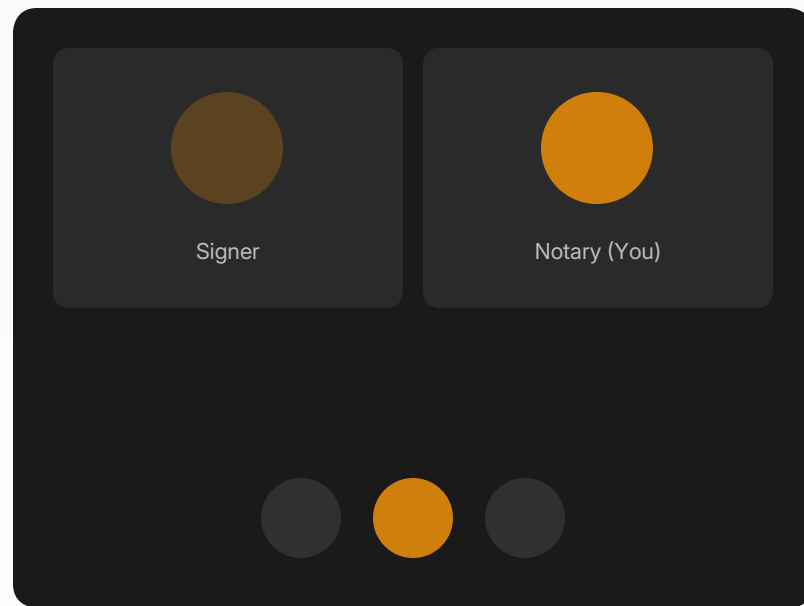

## Notary Stamp

Set up your official stamp

# Run a controlled notarization session

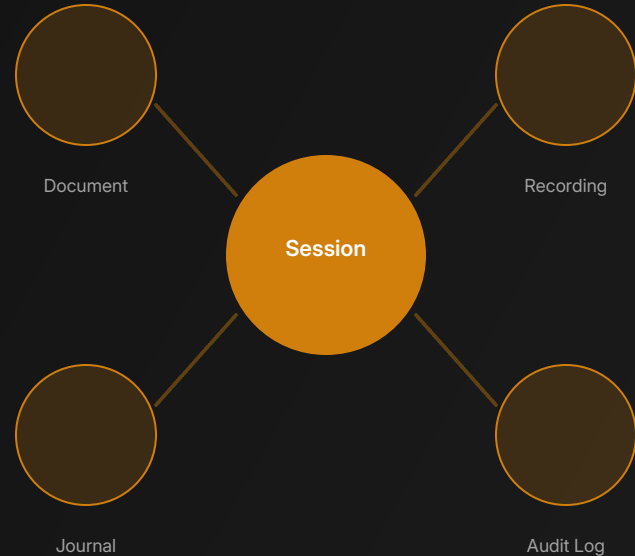

Guide each signing through a structured audio/video workflow with built-in steps designed for online notarization.

*Key actions happen in the right order, inside one session.*

# Keep everything tied to the notarization

Session details and related records stay connected as part of the workflow - so you're not piecing things together afterward.

# Handle online notarization payments clearly

Use billing controls designed for RON to manage how charges are handled for each session.

*Helpful when online notarizations have different cost structures than in-person work.*

## RON Session Billing

Online notarization fee	\$25.00
-------------------------	---------

Additional signatures (x2)	\$10.00
----------------------------	---------

Technology fee	\$5.00
----------------	--------

---

<b>Total</b>	<b>\$40.00</b>
--------------	----------------

Collect Payment

# A more complete way to offer RON

NotaryCentral brings setup, identity verification, live sessions, records, and billing into one workflow - so you can run online notarizations with more structure and less friction.
